

## PRESS RELEASE

### **Etu Energias Empowers Students in Energy and Electrical Installations at Alda Lara Polytechnic Institute**

**Luanda, May 20, 2025** – Etu Energias, S.A., as the operator of Blocks 2/05, CON-1, CON-2, CON-6, and CON-8, as well as the FS/FST Associations, has been developing a structured and sustainable approach to Social Responsibility, contributing to the progress of the communities where it operates, with a special focus on health, education, social integration, and economic development.

On May 20, the Alda Lara Polytechnic Institute hosted the closing ceremony of the Technical and Vocational Training Program, which included the participation of **66** graduating students from the Energy and Electrical Installations courses.

This training program, aimed at empowering the new generation and preparing them for the challenges of the job market, has also been successfully implemented at the Soyo Polytechnic Institute and the Bengo Polytechnic Institute, having already benefited over **2,500** trainees.

The event also featured a presentation of the top-performing students in the class, coordinated by the Technical and Metallurgical Training Center (CFTM), the entity responsible for the final evaluation of the trainees' performance.

As an incentive for academic excellence and continued learning, the top two students were awarded university scholarships offered by Etu Energias. The remaining participants are now qualified to enter the job market or pursue entrepreneurial ventures, having successfully completed this training phase.

This initiative reinforces Etu Energias' commitment to the empowerment of young Angolans, by investing in the development of technical skills that foster economic growth and support the sustainability of the national energy sector.
